EDUCATION

University of California Davis   **September 2023 - March 2025**
Master of Science in Computer Science

University of California Santa Cruz   **September 2019 - June 2023**
Bachelor of Science in Computer Science Game Design with a Minor in Computer Science

WORK EXPERIENCE: 2 YEARS

University of California Santa Cruz   **Nov. 2021 - Sep. 2023**
Frontend Developer   **Santa Cruz, CA**

- Improved accessibility and functionality across 3 university websites by maintaining site health, increasing successful user flows through elevated accessibility
- Enhanced and customized 10+ pages using HTML, CSS, and the university's WCMS, leading to a 15% faster average load time and better user navigation
- Resolved 50+ layout and interactive bugs, improving cross-browser compatibility and reducing reported issues by 30%
- Conducted 10+ usability tests with faculty and staff from other departments to identify navigation issues and guide iterative UI/UX improvements

Autodesk   **Jun. 2022 - Sep. 2022**
Software Engineer Intern   **Remote**

- Boosted code reliability by writing 5+ comprehensive unit tests using Jest and resolving 15+ Typescript/React Native errors, resulting in a 15% reduction in production bugs
- Collaborated with cross-functional UX and engineering teams to design and prototype a new filter panel in Figma, cutting user interaction time by 20% based on test feedback
- Performed continuous integration and deployment for automated testing and deployment, boosting team productivity with faster test feedback and smoother deployment processes

Research

UC Davis Quadcopter Game System   **Apr. 2024 - Feb. 2025**
Graduate Research Assistant   **Davis, CA**

- Engineered a Unity-based multiplayer AR quadcopter game system for research purposes, enhanced real-time performance and refined gameplay mechanics
- Collected and analyzed gameplay data to inform system optimization and user experience improvements

Projects

Supportly

- Developed a mental health chatbot using Retrieval-Augmented Generation (RAG) with Pinecone and GPT-3.5, deployed with Next.js and Node.js backend, leveraging OpenAI embeddings for context-aware responses

MindLog

- Developed a secure full-stack Mood Tracker with React/Tailwind, Node.js/Express, Supabase Auth, and MongoDB for CRUD mood tracking

Reddit Sentiment Analysis

- Achieved 96% classification accuracy by developing and comparing Naive Bayes, SVM, Logistic Regression, and Random Forest models on sentiment and engagement data from 1,000+ Reddit posts across 10 subreddits

FitFlow

- Built an iOS app in Swift/Xcode that recommends workout music based on BPM using HealthKit and Spotify API, enabled real-time tracking and uses personalized playlists

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** AWS AI Practitioner
- **Languages:** JavaScript (TypeScript), Python, Java, Swift, Kotlin, C++, C#, Go, SQL
- **Frameworks/Tools:** React, React Native, Node.js, Express, FastAPI, MongoDB, Docker, CI/CD
- **Libraries:** TensorFlow, PyTorch, NumPy, pandas, Scikit-learn
- **Design Tools:** Figma, Unity, Unreal Engine, Adobe Suite
